from the rich soil of the "ORIENT," and is possessed of
a peculiarly delicious flavor entirely naknewn to the tobacces of all other climes. But its unprecedented popularity
has sprong from the fact of the entire absence of that deadly
poison, Nicolia, which permeates every other tobacco, and
which is the one and soil cause of the distressing nervous
diseases, dyspepsia, &c., which most invariably, sconer or later, follow the indulgence of the pape and class. At the recent analyzation of tobacco from all puris of the world, at
the Academy of Sciences, in Faris, the renowned Ghomist, M.
Lamoureaux, declared that while European and American
tobacco contained fully sight per cent, and the purest Havana tobacco from two to five per cent, of Nicolia, the
UNINGAROBA did not contain one discoverable particle of
that deadly poison, a drop of which, extracted, will destroy that deadly poison, a drop of which, extracted, will desiroy ities.

Our Agent at BOMBAY has shipped as large quantities of the CHINGORORA during the past two years, and although we have been pressed to supply the domand for this delicious luxury to the voteran smoker, yet we are now prepared to after it in unlimited quantities, at a price much lower than some American tobacco of a far inferior quality.

A connelseur has but to smoke the American robacco and segars, which are invariably chemically flavored, to be disgusted with the medicinal tasts which leaves a nausecess, unhealthy coating in the mouth, and in time solion fails to shatter the nervous system

The natives of the "OHIGNY" smake the CHINGARORA from more till night, from youth to age, and are happily unconscious of the wild, distressing five which courses through the veins of the inhaier of the fumer of tobacco containing Nicotics.
